

FIXICC Agent and FIXICC UI upgrade instruction

- Upgrade Preparation
- FIXICC Agent Upgrade Procedure
 - FIXICC Agent upgrade on Linux
 - FIXICC Agent upgrade on Windows
- FIXICC UI Upgrade Procedure

It is recommended to follow the steps listed below in order to upgrade FIXICC Agent and FIXICC UI.

Upgrade Preparation

1. Download FIXICC package with its new version;
2. (Skip this step if you install FIXICC / FIXICC Agent v. 2.9.16 or higher)
Backup your current license file (*fixaj2-license.bin*).
If your license has expired or was lost, contact sales@btobits.com to obtain the new one;
3. Export FIXICC servers configuration: *File --> Export Configuration*;
4. Backup *<fixicc-agent>\<conf>* directory;
5. Prepare configuration amendments in case you plan to change any credentials, destination folders, connection parameters, etc. Refer to [configuration guides](#) for assistance;
6. Make sure you have sufficient administration permissions for further uninstall/install procedures.

FIXICC Agent Upgrade Procedure

FIXICC Agent upgrade on Linux

1. Stop the FIXICC Agent process, if it's running, using *fixicc-agent/bin/stopDaemonNoPriv.sh* script. Use *stopDaemon.sh* script if the Agent was started by *startDaemon.sh*;
2. Remove the FIXICC Agent process using *fixicc-agent/bin/uninstallDaemonNoPriv.sh* script;
3. Replace *<fixicc-agent>* directory with new files;
4. Copy *<fixicc-agent>\<conf>* from backup directory to *<fixicc-agent>* directory;
5. (Skip this step if you install FIXICC Agent v. 2.9.16 or higher)
Copy your current FIXICC Agent license (*fixaj2-license.bin*) to the *<FIXEdge>* directory;
6. Install the FIXICC Agent process using *fixicc-agent/bin/installDaemonNoPriv.sh* script;
7. Start the FIXICC Agent process using *fixicc-agent/bin/startDaemonNoPriv.sh* script.

FIXICC Agent upgrade on Windows

1. Unzip new FIXICC Agent to required destination;
2. (Skip this step if you install FIXICC Agent v. 2.9.16 or higher)
Copy your current FIXICC Agent license (*fixaj2-license.bin*) to the new *FIXEdge\fixicc-agent* directory;
3. Remove the FIXICC Agent service from Windows Services;
4. Install the FIXICC Agent service using *FIXEdge\fixicc-agent\bat\installService.bat* script;
5. Start the FIXICC Agent service using *FIXEdge\fixicc-agent\bat\startService.bat* script.

FIXICC UI Upgrade Procedure

1. Close FIXICC if it is running at the moment;
2. Clean up directory *C:\Users\%USER_NAME%\AppData\Roaming\fixicc*;

See *Help -> About* for actual working directory.

3. Unzip new FIXICC to the destination directory;
4. Run FIXICC from the new *<fixicc>\<bin>* directory;
5. (Skip this step if you install FIXICC v. 2.9.16 or higher)
Import the FIXICC license (*fixaj2-license.bin*) file using *Help -> Import License* menu;
6. Import the servers configuration from saved file: *File --> Import Configuration*;
7. Connect to the FIXICC Agent with Username=*user* and Password=*pass*.

Actual credentials are disclosed under *[users]* in *security.properties* of the FIXICC Agent.
